MultaQa Qatar 2009

John Tan, Chief Executive
15 March 2009

In Asia. For Asia.

Linkages and complexity of financial systems in a globalized environment

- Holistic governance / Regulation
- Matching capital to risks
- Transparency and Pricing
- Specialty *versus* Diversity
- Expertise and Adaptability

Rethinking and reform of the risk industry

- Long term return *versus* Short term compensation
- RORAC on both revenue and balance sheet
- Developed markets *versus* Developing markets
- Free market efficiency *versus* Security economics in an increasingly changing and uncertain environment
- Discipline and return expectations

Balancing risk appetite with sustainability

- Dreams *versus* Realities
- Gaps in opportunities and distribution
- Gaps in information and knowledge
- Concepts, solutions and realities in the current crisis
- Optimising and sharing in the spirit of free trade and positive relationship

Thank you....
